

Sample Scene Verification Checklist

Checklist for verifying the remaining sample scenes.

Note: `MptkIntegrationSampleScene.unity` additionally requires `FEATURE_USE_MPTK`.

Common prerequisites

Items to confirm for every scene:

- ☐ Open the scene and enter **Play mode** (no console errors)
- ☐ Open **Window > MIDI > Monitor** and check IN/OUT as needed
- ☐ Enable the relevant **Scripting Define Symbols** (see table below)
- ☐ The IMGUI panel appears and responds to button input

Scripting Define Symbols

Symbol	Target scene
FEATURE_USE_TIMELINE + com.unity.timeline	MidiTimelineIntegrationSampleScene
FEATURE_USE_VISUALSCRIPTING + com.unity.visualscripting	MidiVisualScriptingIntegrationSampleScene
FEATURE_MIDI_NETWORK	MidiNetworkJamSampleScene
FEATURE_INPUT_SYSTEM + com.unity.inputsystem	InputSystemBridgeSampleScene

Scene list

#	Category	Scene	Path
1	Gameplay foundation	MidiGameplaySampleScene	Assets/MIDI/Samples/Gameplay/Scenes/MidiGameplaySampleScene.unity
2	Unity integration	MidiAnimatorIntegrationSampleScene	Assets/MIDI/Samples/Integrations/Scenes/MidiAnimatorIntegrationSampleScene.unity
3	Unity integration	MidiTimelineIntegrationSampleScene	Assets/MIDI/Samples/Integrations/Scenes/MidiTimelineIntegrationSampleScene.unity
4	Unity integration	MidiVisualScriptingIntegrationSampleScene	Assets/MIDI/Samples/Integrations/Scenes/MidiVisualScriptingIntegrationSampleScene.unity
5	Gameplay	ChordPuzzleSampleScene	Assets/MIDI/Samples/Gameplay/Scenes/ChordPuzzleSampleScene.unity
6	Gameplay	ChordScaleSampleScene	Assets/MIDI/Samples/Gameplay/Scenes/ChordScaleSampleScene.unity
7	Gameplay	MidiClockSyncSampleScene	Assets/MIDI/Samples/Gameplay/Scenes/MidiClockSyncSampleScene.unity
8	Gameplay	ScalePracticeSampleScene	Assets/MIDI/Samples/Gameplay/Scenes/ScalePracticeSampleScene.unity
9	Input System	InputSystemBridgeSampleScene	Assets/MIDI/Samples/Integrations/InputSystem/Scenes/InputSystemBridgeSampleScene.unity
10	Networking	MidiNetworkJamSampleScene	Assets/MIDI/Samples/Integrations/Networking/Scenes/MidiNetworkJamSampleScene.unity
11	Foundation	FoundationSampleScene	Assets/MIDI/Samples/Foundation/Scenes/FoundationSampleScene.unity

Recommended test order

1. **Foundation:** MidiGameplaySampleScene
2. **Unity integrations:** Animator → Timeline → Visual Scripting
3. **Cross-cutting:** ClockSync → Chord/Scale → InputSystem
4. **Networking / Foundation:** MidiNetworkJamSampleScene → FoundationSampleScene

Per-scene checklist

1. MidiGameplaySampleScene

Path: `Assets/MIDI/Samples/Gameplay/Scenes/MidiGameplaySampleScene.unity`

Purpose: DeviceFilter → ChannelFilter → Router / NoteTracker pipeline

- ☐ After Play starts, IMGUI shows pipeline state
 - ☐ **NoteOn C4 (ch0)** → Router Launch binding fires (log / counter update)
 - ☐ **CC64 = 127 (ch0)** → Toggle binding fires
 - ☐ **NoteOn C4 (ch1)** → blocked by ChannelFilter (does not reach Router / Tracker)
 - ☐ **Add D4 + E4 (ch0)** → 3-note chord detection message
 - ☐ SmfPlayer playback / MidiRecorder recording sections work
 - ☐ With a hardware MIDI controller, C4 / CC64 on ch0 behave the same way
-

2. MidiAnimatorIntegrationSampleScene

Path: `Assets/MIDI/Samples/Integrations/Scenes/MidiAnimatorIntegrationSampleScene.unity`

Purpose: Drive Animator parameters from MIDI

- ☐ **CC1 = 127** → cube rises
 - ☐ **Note 60** → pulse effect (scale change)
 - ☐ **CC10 / CC11** → cube rotates
 - ☐ Same changes via both virtual MIDI Inject and hardware input
-

3. MidiTimelineIntegrationSampleScene

Path: `Assets/MIDI/Samples/Integrations/Scenes/MidiTimelineIntegrationSampleScene.unity`

Requires: `FEATURE_USE_TIMELINE`, `com.unity.timeline`

- ☐ **Play Timeline** → SMF playback starts
 - ☐ Director time and SmfPlayer time stay in sync
 - ☐ **Pause** → SmfPlayer pauses
 - ☐ **Seek to 1.0 s** → SmfPlayer follows
-

4. MidiVisualScriptingIntegrationSampleScene

Path: `Assets/MIDI/Samples/Integrations/Scenes/MidiVisualScriptingIntegrationSampleScene.unity`

Requires: `FEATURE_USE_VISUALSCRIPTING`, `com.unity.visualscripting`

- ☐ **NoteOn C4** → cube color changes
 - ☐ **CC1 = 127** → visual feedback changes
 - ☐ Events arrive via Event Bus / Script Graph
-

5. ChordPuzzleSampleScene

Path: `Assets/MIDI/Samples/Gameplay/Scenes/ChordPuzzleSampleScene.unity`

Purpose: Chord-name quiz (MidiScaleQuiz)

- ☐ Target chord is shown on screen
 - ☐ **Hold C Major / C Minor / Cmaj7** → recognized chord appears in the log
 - ☐ **Check Answer** → Correct / Incorrect judgment
 - ☐ On correct answer, **Next Puzzle** advances to the next challenge
 - ☐ **Release All** releases notes
-

6. ChordScaleSampleScene

Path: `Assets/MIDI/Samples/Gameplay/Scenes/ChordScaleSampleScene.unity`

Purpose: ChordRecognition + MidiChordDetector + MidiScaleQuiz

- ☐ **Hold C Major** → Chord = C, C Major scale = OK
 - ☐ **Hold C Minor** → Chord = Cm
 - ☐ **Add Out-of-scale Note (61)** → Out of scale display / log
 - ☐ **Evaluate Quiz Target = C** → quiz judgment
 - ☐ **Release All** resets state
-

7. MidiClockSyncSampleScene

Path: `Assets/MIDI/Samples/Gameplay/Scenes/MidiClockSyncSampleScene.unity`

Purpose: External MIDI Clock sync and BPM estimation

- ☐ **Inject Start** → IsPlaying = true
 - ☐ **Inject 24 Timing Clocks** → BPM estimate updates, Bar/Beat advances
 - ☐ **Inject Stop** → stops
 - ☐ **Set Adapter Mode: Step / Follow** → SmfPlayerClockAdapter mode switches
 - ☐ onBeat events appear in the log
-

8. ScalePracticeSampleScene

Path: `Assets/MIDI/Samples/Gameplay/Scenes/ScalePracticeSampleScene.unity`

Purpose: Membership checks for all scale types

- ☐ Switching scale type (Major / Minor, etc.) updates the In scale display
 - ☐ **Add C4 (60)** → In scale: Yes (when Major is selected)
 - ☐ **Add C#4 (61)** → In scale: No, Scale violation log
 - ☐ **Add E4 (64)** → chord recognition display updates
 - ☐ **Release All** clears state
-

9. InputSystemBridgeSampleScene

Path: `Assets/MIDI/Samples/Integrations/InputSystem/Scenes/InputSystemBridgeSampleScene.unity`

Requires: `FEATURE_INPUT_SYSTEM`

- ☐ After Play starts, a Synthetic Device is created
 - ☐ MIDI Inject reflects into Input System state
 - ☐ Input Action → MIDI send (bidirectional bridge)
 - ☐ Confirm IN/OUT in Monitor
-

10. MidiNetworkJamSampleScene

Path: `Assets/MIDI/Samples/Integrations/Networking/Scenes/MidiNetworkJamSampleScene.unity`

Requires: `FEATURE_MIDI_NETWORK`

- ☐ Connect via Hub / Client loopback or two instances
 - ☐ In Broadcast mode, MIDI events inject into the Client-side virtual device
 - ☐ Switch Merge / Playback modes (if UI is available)
 - ☐ Confirm Client-side IN in Monitor
-

11. FoundationSampleScene

Path: `Assets/MIDI/Samples/Foundation/Scenes/FoundationSampleScene.unity`

Purpose: Device selection, latency calibration, Foundation UI

- ☐ After Play starts, the Foundation UI shell appears
- ☐ Device selection UI lists connected devices
- ☐ Latency calibration flow works
- ☐ Settings persistence (if present) works
