

Embedded Third-Party Modules

This repository contains embedded modules and vendored sources used by transports.

This page helps you find their docs and licenses.

RTP-MIDI-for-.NET (embedded module)

Location:

- `Assets/MIDI/Scripts/RTP-MIDI-for-.NET/`

Includes:

- its own `README.md`, `LICENSE`, and changelog
- an embedded documentation page under its `Documentation~/` folder

Unity integration is provided by:

- `Assets/MIDI/Scripts/MidiPlugin.RtpMidi.cs`

UDP MIDI 2.0 discovery dependencies (vendored sources)

Location:

- `Assets/MIDI/Scripts/UdpMidi2Discovery/`

These sources support discovery workflows (mDNS/DNS and helpers). If you modify or redistribute the package, ensure you comply with each component's license.

See also:

- [Contacts / Support](#) (lists discovery dependencies and versions)

VST3 Plugin Host (not bundled)

This MIDI package does **not** redistribute the VST3 SDK, `VstHostNative.dll`, VST host C#, or third-party `.vst3` plugins.

VST® is a registered trademark of Steinberg Media Technologies GmbH.

For VST3 hosting in Unity, use the separate package [Unity-VST3-Bridge](#)

(`jp.kshoji.unity.vst3nativehost`) and its `NOTICE.md` / documentation. Short integration pointer: [Integrations — VST3 Plugin Host](#).
