

Unity-MCP API Coverage Matrix

Pinned: `com.ivanmurzak.unity.mcp` **0.89.0**
Related: [define matrix](#) · [sample prompts](#) · [MCP README](#)

Legend: **Direct tool** · **Generic tool** · **Raw only** · **Diagnostic only** · **Out of scope**

MIDI 1.0 (`MidiOutgoingMessageType`)

Enum / API	Coverage	Tool
NoteOn / NoteOff	Direct	<code>midi-send-note</code>
ControlChange	Direct	<code>midi-send-cc</code>
ProgramChange	Direct	<code>midi-send-pc</code>
ChannelAftertouch, PolyphonicAftertouch, PitchWheel	Generic	<code>midi-send-message</code>
SysEx / SystemCommon / SingleByte / MTC / Song* / Tune / Clock / Start/Continue/Stop / ActiveSensing / Reset / Misc / Cable	Generic	<code>midi-send-message</code>
All Sound/Notes Off	Direct	<code>midi-panic</code>
Virtual inject (all above)	Generic	<code>midi-virtual-device-inject</code> (+ convenience <code>midi-virtual-device</code>)
Device name/vendor/product	Direct	<code>midi-device-info</code>
Midi2RawUmp (on MIDI1 enum)	Raw only	<code>midi2-send-ump</code>

MIDI 2.0 / UMP (MidiManager send / inject)

Category	Coverage	Tool
Initialize / Terminate / status	Direct	<code>midi2-lifecycle</code>
Device list	Direct	<code>midi2-devices-list</code>
Channel voice (Note/AT/CC/PC/PB/Per-Note/RPN/NRPN relative)	Direct	<code>midi2-send-channel-voice</code>
Utility + MIDI1 System on UMP path	Direct	<code>midi2-send-system</code>
SysEx data	Direct	<code>midi2-send-data</code>
Flex: tempo / time sig / key / text	Direct	<code>midi2-send-flex-data</code>
Flex: metronome / chord name structs	Raw only	<code>midi2-send-ump</code> (structured MCP deferred — complex structs)
Stream: EndpointDiscovery / StartOfClip / EndOfClip	Direct	<code>midi2-send-stream</code>
Stream: Endpoint Info/Identity/Name/Product/FunctionBlock/Config	Raw only	<code>midi2-send-ump</code>
Raw UMP escape hatch	Raw only	<code>midi2-send-ump</code>
Virtual register + inject	Direct	<code>midi2-virtual-device</code>
UMP monitor filter	Direct	<code>midi2-monitor-read</code>

UMP Sequence

API	Coverage	Tool
UmpSequencer play/seek/loop	Direct	<code>ump-sequencer-control</code>
UmpSequencer record/save	Direct	<code>ump-recorder-control</code>
Sequence ↔ UmpSequence	Direct	<code>ump-sequence-convert</code>
Import <code>.midi2</code> asset	Direct	<code>ump-import-asset</code>

Transport

API	Coverage	Tool
RTP-MIDI start/stop/connect	Direct	<code>midi-rtsp-session</code>
BLE scan/advertise	Direct	<code>midi-ble-control</code> (platform-gated)
Nearby discover/advertise	Direct	<code>midi-nearby-control</code>
UDP MIDI 2 / UMP Endpoint	Direct	<code>midi2-udp-session</code> (secrets never echoed)
Aggregate status	Diagnostic	<code>midi-transport-status</code>
<code>FEATURE_ANDROID_COMPANION_DEVICE</code>	Diagnostic only	<code>midi-features-status</code> / docs (build post-process, not a runtime transport tool)

Foundation / Gameplay

API	Coverage	Tool
MidiDeviceSelection	Direct	<code>midi-device-selection</code>
MidiLatencyCalibrator	Direct	<code>midi-latency-calibration</code>
MidiOutputRoutingPreset	Direct	<code>midi-output-routing</code>
MidiClockSync / MidiClockOutput	Direct	<code>midi-clock-sync</code> / <code>midi-clock-output</code>
ChordRecognition / MidiChordDetector	Direct	<code>midi-chord-state</code>
Note/scale theory	Direct	<code>midi-theory-utility</code> (+ existing <code>midi-note-utility</code>)
SmfPlayer loop/gain/transpose full edit	Out of scope	Use <code>smf-player-control</code> + Inspector; add <code>smf-player-configure</code> later if needed
InputMap binding CRUD (all message types)	Out of scope	Existing <code>midi-setup-router</code> covers create/append; full list/update/remove deferred
Animator mapping list/update/remove	Out of scope	Existing <code>midi-animator-add-*</code> remains append-oriented

Monitor

Item	Coverage	Notes
includeRaw / sinceTimestamp	Direct	<code>midi-monitor-read</code>
MidiMonitorMessageType expansion (Channel AT / Poly AT / Sys Common/Realtime split)	Out of scope	Would require core classification changes in <code>MidiMonitorMessageType</code> producers; Detail string remains source of truth
Device attach/detach Resource	Out of scope	Prefer <code>midi-device-info</code> + Play Mode device lists

MPTK Free extras

Tool	Coverage
<code>midi-mptk-stream-command</code>	Direct (<code>MptkUtility</code>)
<code>midi-mptk-midi2-device</code>	Direct
<code>midi-mptk-mpe-zone</code>	Direct (<code>ConfigureZone</code>)
<code>midi-mptk-delayed-dispatch</code>	Direct
<code>midi-mptk-global-settings</code>	Direct (<code>MPTK_RunInBackground</code> / <code>MPTK_AudioListener</code>)
<code>midi://mptk/setup-report</code>	ValidateSetup + diagnostics (voice stats / SoundFont / global knobs)
<code>midi-mptk-distance-audio</code>	Direct (<code>MptkDistanceAudioSettings</code> / <code>DistanceAttenuation</code> · <code>Orientation</code>)
<code>midi-mptk-bank-program</code>	Direct (+ <code>action=list-drums</code> for drum preset catalog)
<code>midi://mptk/soundfont</code>	SoundFont name + drum preset catalog
<code>midi-mptk-velocity-attenuation</code>	Direct (experimental <code>MPTK_VelocityAttenuation</code> ; default 960)

MPTK Pro extras

Tool	Coverage
<code>midi-mptk-effects-configure</code>	Direct (<code>MptkSynthEffectsController</code> / <code>SoundFont</code> <code>filter·reverb·chorus</code>)
<code>midi-mptk-voice-lifecycle</code>	Direct (<code>MptkVoiceLifecycle</code> / <code>PauseVoices</code> · <code>ResumeVoices</code>)
<code>midi-mptk-chord-progression</code>	Direct (<code>MptkChordProgressionPlayer</code> / Maestro progression presets)

MIDI-CI

Item	Coverage
Discovery	Direct (<code>midi-ci-discover</code>)
Profile / Property / Protocol Negotiation	Out of scope until library APIs exist

Scriptable Audio / Network (Editor vs Player)

Tool	Host
<code>midi-sa-bootstrap-*</code>	Editor (wiring)
<code>midi-sa-transport</code> / <code>midi-sa-clock-mode</code> / <code>midi-sa-validate</code>	Player control (existing generators)
<code>midi-net-hub-client-setup</code> / <code>midi-net-bridge-setup</code> / <code>midi-wsnet2-sync-defines</code>	Editor (wiring / defines)
<code>midi-net-discovery-status</code> / <code>midi-net-rtt</code>	Player control (<code>ensure*</code> <code>create</code> is Editor-only)

VST3

Item	Coverage
Host operations	Out of scope in this repo

Safety metadata

Tool	Note
<code>midi2-devices-list</code>	<code>ReadOnlyHint</code> removed (initialize side effect)
<code>mpe-zone-status</code>	<code>ReadOnlyHint</code> removed (setUpIfMissing)
<code>midi-net-discovery-status</code>	<code>ReadOnlyHint</code> removed (ensure*)
<code>midi-net-rtt</code>	<code>ReadOnlyHint</code> removed (ping)
Destructive paths	<code>confirm=true</code> on define enable, asset overwrite (UMP convert/save, routing preset)
